

ProPAR

Asset management with
no more guesswork and
much less legwork

ProPAR stands for Proactive PAR, the latest offering from Cognosos that enables central supply and biomed teams to stay ahead of asset management needs by providing accurate and real-time visibility to asset counts and PAR level thresholds throughout hospitals and healthcare facilities.

Built on the innovative foundation of LocationAI™, Cognosos' AI-powered location engine, ProPAR combines automatic replenishment notifications and accurate room-level visibility to eliminate the need for teams to manually locate equipment for maintenance, cleaning, or re-circulation, and ensures the clinical staff's needs for medical equipment are always met.

Turn reactive work into proactive process

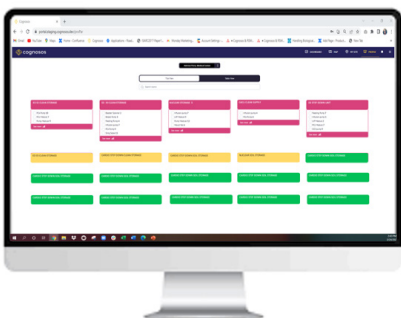

- PAR level settings and automatic replenishment notifications alert teams to asset replenishment and maintenance needs
- Easy-to-read dashboards present a summary of asset availability and PAR-level management metrics
- Supports managing assets by exception, saving time and ensuring teams focus only on areas that require replenishment, versus those that are sufficiently stocked
- Removes the legwork from asset collection with the ability for staff to see the status of assets ready for sterilization between patients at-a-glance

Reduce asset management costs

- Understand asset throughput and identify bottlenecks in servicing, cleaning or maintenance
- Optimize asset category counts with enhanced insights around asset movement, dwell time and utilization
- Eliminate time spent searching for assets and enable teams to focus on higher value tasks

Support for enhanced patient care

- Ensure clinical staff will have the right equipment at the right time, every time
- Provide a seamless patient experience by decreasing time spent waiting for critical equipment

ProPAR includes an intuitive traffic light interface with colors that drive action for teams managing assets.

Red for critical asset levels, yellow to indicate a restock is due before the inventory is too low, and green to indicate inventory is sufficient and teams are good to go!
